Legacy Color Blend Reference Guide

This document provides a detailed reference for color blend transitions resulting from the update from Chips Unlimited materials to Torginol-based formulations.

It is intended for contractors, installers, and customers who need clarity on how legacy blends correspond to current offerings.

This guide includes:

- Legacy Chips Unlimited blends and their closest Torginol equivalents
- Blends that were refined or consolidated
- Renamed blends with updated identities
- Blends no longer included in standard inventory and their current availability status

While the 40 Signature Blends represent our current inventory program, many additional legacy blends remain available through custom order or existing inventory depending on material availability.

Definitions:

Stocked: Blend is part of our standard inventory program and regularly available.

Custom Order: Blend is not stocked but can be produced upon request with lead time.

Limited: Blend is available only while remaining inventory exists.

Discontinued: Blend is not reproducible with current materials; no acceptable match available.

Matched: Blend has been refined with minor adjustments while maintaining close visual continuity with the original.

Revised: Blend has undergone significant formulation changes to preserve overall visual intent using currently available materials.

Consolidated: Multiple historical blends have been combined into a single optimized formulation to reduce overlap and improve overall offering.
